Subject: - Amendment in e-tender notice No 10 of 2018 dated 12.03. 2018.

Following amendments in the specification of Containerized Shooting Range and Shoot House tendered by this Hqrs under e-tender notice No 10 of 2018 dated 12.03. 2018 are hereby notified for the information of intending tenderers:-

Containerized Shooting Range (item No 01)

Serial No	Tender specification	Amended specifications
i	Require a turnkey solution for 40 feet Containerized Shooting Range (CSR) having software capability of decreasing /increasing Firing Range upto 300 meters	Containerized Shooting Range (CSR) 40 feet long meeting all international standards of the safety and pollution etc. supported by necessary lab certification and software simulation capability of increasing/decreasing Firing Range upto 300 meters.
iii	The whole structure should be modular in nature. It should allow setting up a shooting range at any place	Each Containerized Shooting Range should have firing facility for 02 Firers at a time .The system should be portable to set up at any desired location.
xii	It should have Electronic Multi-Function Targets and Virtual Targets systems	It should have smart target system one in each tube capable to detect bullets, points of hits and display them on the firing point equipment near firer position. The Control Station is also available outside the container one each for both the shooting tubes for monitoring and record purpose .
XVI	It should have Control Station	It should have one Control Station each outside the Container and a monitoring tab near the firer to monitor the firing .The control station should be capable of printing the firing result of the firer.
XX	It should have shooting distance of 25 meters	The Containerized Shooting Range structure should be 40 feet long with smart target simulation facility to enable increased feel of firing range up to 300 meters.
XXI	It should have 04 firing positions/booths having facility for 04 trainees at a time	It should have 03 firing position (standing, kneeling and lying) and facility for 02 firer at a time.
XXXIV	The system should have warranty of 05 years	The system should have comprehensive warranty of 05 years including consumables etc.

Item No 02 SHOOT HOUSE

S.No	Tender specification	Amended specifications
4	Bullet stops are designed to contain all types of small arms bullets fired into Buss Stop without danger of backslash and ricochet.	It should be based on round encapsulation in an air gap almost 1.5 inch between the Armour Plate backing and the ballistic rubber panelling 2 inch or more thick.
7	<p>The approved supplier has to design the Shoot House with modern and versatile array of target system as follows:-</p> <p>a) Multi-Function Smart Target. These targets may be activated by Motion Sensors or/and Proximity Sensors triggered by the trainee's movement or be operated remotely by the instructor or be operated from the control room. The targets feature of various Targets may be configured for behavior as per user requirements such as pop-up, slice or Friend or Foe or Hostages and hits on all targets would be recorded accordingly. For example, for a particular exercise, the target may be configured to pop up on activation and again drop down within, say, two seconds. Hence, the trainee/firer has to correctly engage the target within intended time thus offering reflex training and realism. Similarly, three targets may pop up of which one may be friend and the other two foes; and the trainee/s would have to engage the correct targets within 'UP' time and not shoot the friend. He may have to 'Judge' to make the correct choice to shoot, hence judgment training targets may also be configured. The Targets system should significantly promote training value and realism.</p> <p>b) No Ammunition Practice:- The shoot house should provide facility to carry out training for an operation without use of Live Ammunition. Which should be achieved by the use of laser based attachments to the weapons and laser sensitive targets across the shoot house. This type of practice should help in determining the reaction time of the user and facilitates two sided engagement training. This facility is required for training purpose to save the cost of ammunition.</p>	In addition to tender specifications the approved supplier has to provide electronic targets, friend and foe targets.

Handwritten signature

	<p>Recording and Scoring. Shoot House should have the ability to record all hits and misses, (of both live as well as laser firing), instantly and also display them on instructor station and control room. Other than just hit/miss, the Shoot House must have unique feature of "Scoring" the performance of the trainees based on parameters which may be configured by the user himself. Parameters which the system can measure are response time to shoot, alertness, quick reflexes, judgmental shoot/not shoot parameters/ whom to shoot between friend and foe, Terrorist/Hostage, reaction of trainee if he shoots hostage by error, co-operation within the teams under training etc</p>	
--	---	--

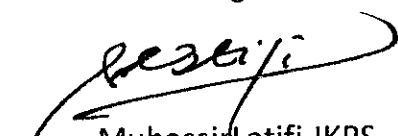

Brief specifications shall be as under:-

S.No	Tender contents	Amended contents
2	<p>J&K Police initially intend to have Shoot House comprising of Two Rooms. Rooms should be of 13 Feet x 10 Feet with one corridor. The height of walls should be 8 Feet. Ideally Shoot House may have 'Roof' open able at some points .However, suggestions of the intending firms shall also be analyzed during pre-bid conference.</p>	<p>J&K Police intend to have Shoot House comprising of four Rooms. Rooms should be of 12 x 12 feet with one corridor. The height of walls should be 10 Feet. Ideally Shoot House may have 'Roof' covered with GC tin sheet or as suggest by the supplier but openable at some points</p>

Consequent upon above the last date for receiving tender offers and online opening of technical bids are extended as under to provide sufficient time to the prospective bidders to submit their bids :-
